Zdanski, MD; Natacha Teissier, MD, PhD; Nicolas Fakhry, MD, PhD

**Objectives/Hypothesis:** Otolaryngology instructional videos available online are often of poor quality. The objective of this article was to establish international consensus recommendations for the production of educational surgical videos in otolaryngology.

**Study Design:** DELPHI survey.

**Methods:** Twenty-seven international respondents participated in this study from 12 countries. Consensus was reached after three rounds of questionnaires following the Delphi methodology. The proposals having reached the 80% agreement threshold in the third round were retained.

**Results:** The main recommendations are as follows: 1) Ethics: patients must be anonymized and unrecognizable (apart from plastic surgery if necessary). A signed authorization must be obtained if the person is recognizable. 2) Technical aspects: videos should be edited and in high-definition (HD) quality if possible. Narration or subtitles and didactic illustrations are rec-
Educational activities: Video special issue of European annals of ORL

Call for ENT videos

The European Annals of ORL, Head and Neck Diseases plan to publish a special issue as part of an “educational videos” project of the YO-IFOS Education committee, to promote internationally peer reviewed ENT videos. The best educational videos submitted to the European Annals will be published with a short introduction in an electronic supplement (special issue).

Why publish your video articles with the European Annals:

- Electronic simple online submission with Editorial Manager
- High quality peer review
- Follow-up from submission to publication
- After acceptance fast online publication on several websites: EM-Consulte, EM-Premium, ScienceDirect, Scopus, ClinicalKey

YO-IFOS by-laws amendments : next board

- The next President and the General Secretary will be Canadian (and designated by Canada) and the vice-president and the vice-secretary will be from the country designated to host the next meeting.

- In order to keep a link between past, present and future projects: keep a French vice-secretary who will give up his position to a Canadian when the next board is designated 4 years later.

- The current board nominates, when possible, members who already have a previous experience of YO-IFOS to the key positions when the next board is constituted (regional secretaries, chairmen of committees)
  - They must be under 41 at the time they take office as so to be under 45 at the end.
  - The members who will have contributed the most to the success of YO-IFOS (scientific publications, collaborative projects, communication, etc...) should be designated to chair for the important positions.
